EDUCATION

University of California, Santa Cruz, Santa Cruz, CA

Bachelor of Science in Computer Science, September 2023 – June 2026

GPA: 3.4

Selected Coursework: Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Computer Systems Design, Computer Architecture, Computer Graphics, Statistics, Full Stack Development

SKILLS

Programming Languages: Python, JavaScript, Java, C/C++, Dart, HTML/CSS, SQL

Frameworks & Libraries: FastAPI, React Native, Firebase, PyCaret, Flutter, Node.js

Tools & Platforms: Docker, Git, AWS, Google Cloud, Figma, Adobe Creative Suite

Specializations: Machine Learning, Backend Development, Data Visualization, API Design, Cloud Architecture

Languages: English (Fluent), Mandarin (Fluent)

EXPERIENCE

Machine Learning Engineer Intern

Chang Chun Group, Taipei, Taiwan, July 2025 – August 2025

- Deployed FastAPI-based analytics dashboard enabling 3 domain teams to visualize and interpret AutoML experiment results, reducing experiment review time by 40% and accelerating testing workflow iterations
- Engineered automated ML training pipelines using PyCaret, supporting parallel model training across 15+ experiments, achieving reproducible experimentation and 60% reduction in manual configuration time
- Optimized backend data loading and API response times through database query optimization and caching strategies, achieving 70% reduction in load times and improving system responsiveness for 50+ concurrent users
- Increased adoption by 37% through cross-functional collaboration, translating ML outputs to business insights

Web Development Intern

Virtue Group Accounting Firm, Remote, July 2022 – September 2022

- Designed and developed a full-stack production website from wireframes to deployment using JavaScript, HTML, and CSS, delivering responsive landing pages, service pages, and contact workflows
- Led end-to-end project lifecycle, including requirements gathering, UI/UX design, implementation, and deployment, resulting in improved brand clarity and 25% increase in client inquiries post-launch
- Collaborated with stakeholders to align technical solutions with business objectives, translating client feedback into actionable design improvements

PROJECTS

CodeSnap – Mobile Coding Education Platform | React Native, Firebase, Docker, Python, VS Code Extension

- Built a mobile app in React Native with Firebase backend supporting 100+ users with real-time code tracking
- Architected containerized code-execution pipeline using Docker to safely evaluate Python scripts in isolated environments, processing 500+ code submissions with 99.8% uptime and zero security incidents
- Integrated Gemini API for automated code scoring and behavioral analysis, optimizing API calls to reduce average response latency from 3.2s to 1.1s through request batching and caching strategies

SlugSmart – UCSC Financial Purchase Prediction System | React, TypeScript, Python, Vercel, Machine Learning

- Developed a full-stack web analyzing purchases to reduce external spending by identifying items for inventory
- Built a data pipeline processing multi-year datasets to surface spending patterns and vendor trends through React
- Implemented a machine learning prediction system and chatbot providing contextual stocking recommendations with feedback-driven learning based on historical spending data and seasonal trends

OTHER EXPERIENCE

Retail Associate

Retail Market at UC Santa Cruz, Santa Cruz, CA, September 2023 – December 2025

- Delivered high-volume customer service to customers, demonstrating strong communication and problem-solving
- Ranked among the top sales performers while balancing full-time coursework, showcasing time management skill
